 - Franchise jobs 5,800

**Complete details on franchise employment can be found [here](#).

“The job market has shown signs of a slowdown,” said Ahu Yildirmaz, vice president and co-head of the ADP Research Institute. “The average monthly job growth for the past three months is 145,000, down from 214,000 for the same time period last year.”

Mark Zandi, chief economist of Moody’s Analytics, said, “Businesses have turned more cautious in their hiring. Small businesses have become especially hesitant. If businesses pull back any further, unemployment will begin to rise.”

The October 2019 *ADP National Employment Report* will be released at 8:15 a.m. ET on October 30, 2019.

About the ADP National Employment Report®

The *ADP National Employment Report*® is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 24 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
