- **Franchise Employment****
 - Franchise jobs 49,600

**Complete details on franchise employment can be found [here](#).

“The labor market continues an upward trend of acceleration and growth, posting the strongest reading since September 2020,” said Nela Richardson, chief economist, ADP. “Service providers have the most to gain as the economy reopens, recovers and resumes normal activities and are leading job growth in April. While payrolls are still more than 8 million jobs short of pre-COVID-19 levels, job gains have totaled 1.3 million in the last two months after adding only about 1 million jobs over the course of the previous five months.”

The May 2021 *ADP National Employment Report* will be released at 8:15 a.m. ET on June 3, 2021.

About the ADP® National Employment Report™

The *ADP® National Employment Report™* is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
