ADP National Employment Report: Private Sector Employment Increased by 807,000 Jobs in December

ROSELAND, N.J. – January 5, 2022 – Private sector employment increased by 807,000 jobs from November to December according to the December [ADP® National Employment Report™](#). Broadly distributed to the public each month, free of charge, the *ADP National Employment Report* is produced by the ADP Research Institute® in collaboration with Moody's Analytics. The report, which is derived from ADP's actual data of those who are on a company's payroll, measures the change in total nonfarm private employment each month on a seasonally-adjusted basis.

December 2021 Report Highlights*

* Sum of components may not equal total, due to rounding.

- **Franchise Employment****
 - Franchise jobs 39,400

**Complete details on franchise employment can be found [here](#).

“December’s job market strengthened as the fallout from the Delta variant faded and Omicron’s impact had yet to be seen,” said Nela Richardson, chief economist, ADP. “Job gains were broad-based, as goods producers added the strongest reading of the year, while service providers dominated growth. December’s job growth brought the fourth quarter average to 625,000, surpassing the 514,000 average for the year. While job gains eclipsed 6 million in 2021, private sector payrolls are still nearly 4 million jobs short of pre-COVID-19 levels.”

The January 2022 *ADP National Employment Report* will be released at 8:15 a.m. ET on February 2, 2022.

About the ADP® National Employment Report™

The *ADP® National Employment Report™* is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses,

governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).

About the ADP Research Institute

The mission of the ADP Research Institute is to generate data-driven discoveries about the world of work, and to derive reliable economic indicators from these insights.
