

ADP National Employment Report: Private Sector Employment Increased by 247,000 Jobs in April

ROSELAND, N.J. – May 4, 2022 – Private sector employment increased by 247,000 jobs from March to April according to the April [ADP® National Employment Report™](#). Broadly distributed to the public each month, free of charge, the *ADP National Employment Report* is produced by the ADP Research Institute® in collaboration with Moody’s Analytics. The report, which is derived from ADP’s actual data of those who are on a company’s payroll, measures the change in total nonfarm private employment each month on a seasonally-adjusted basis.

* Sum of components may not equal total, due to rounding.

- **Franchise Employment****
 - Franchise jobs 47,400

**Complete details on franchise employment can be found [here](#).

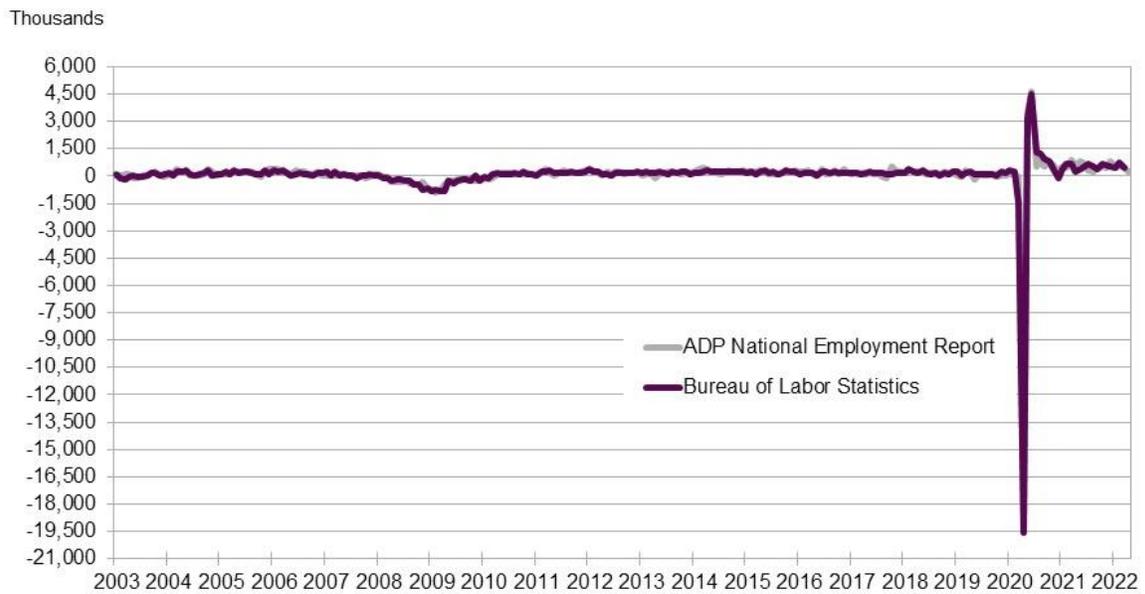

“In April, the labor market recovery showed signs of slowing as the economy approaches full employment,” said Nela Richardson, chief economist, ADP. “While hiring demand remains strong, labor supply shortages caused job gains to soften for both goods producers and services providers. As the labor market tightens, small companies, with fewer than 50 employees, struggle with competition for wages amid increased costs.”

The May 2022 *ADP National Employment Report* will be released at 8:15 a.m. ET on June 2, 2022.

About the ADP® National Employment Report™

The *ADP® National Employment Report™* is a monthly measure of the change in total U.S. nonfarm private employment derived from actual, anonymous payroll data of client companies served by ADP®, a leading provider of human capital management solutions. The report, which measures nearly 26 million U.S. workers, is produced by the ADP Research Institute®, a specialized group within the company that provides insights around employment trends and workforce strategy, in collaboration with Moody's Analytics, Inc.

Each month, ADP Research Institute issues the *ADP National Employment Report* as part of the company's commitment to adding deeper insights into the U.S. labor market and providing businesses, governments and others with a source of credible and valuable information. The *ADP National Employment Report* is broadly distributed to the public each month, free of charge.

The data for this report is collected for pay periods that can be interpolated to include the week of the 12th of each month, and processed with statistical methodologies similar to those used by the U.S. Bureau of

Labor Statistics to compute employment from its monthly survey of establishments. Due to this processing, this subset is modified to make it indicative of national employment levels; therefore, the resulting employment changes computed for the *ADP National Employment Report* are not representative of changes in ADP's total base of U.S. business clients.

For a description of the underlying data and the statistical model used to create this report, please see the [ADP National Employment Report: Development Methodology](#).
